

NTT Communications

Ethernet Access

Accelerate your connection to the world with NTT Communications.

Faster Than Ever Before

NTT Communications is a leading Ethernet provider.

Corporate networks, content, hosting & colocation, and broadband providers, we offer your business flexible and scalable high-speed connections, designed to scale with your changing bandwidth needs. We'll connect you from your office to our POP, and then to the world of limitless connections – NTT Communications' Global IP Network. Our Ethernet services deliver direct access at speeds ranging from 1Mbps up to 10GigE – the fastest possible delivery on the planet.

UNPRECEDENTED SPEEDS

Enter our 10Gig Ethernet service.

Currently exceeding 300Gbps of lit capacity – the highest capacity currently operating Transpacific – NTT Communications is leading the industry. **And more often than not, we can implement a 10GigE line in the same amount of time it takes other ISPs to get their 1GigE lines up and running.** Just think of the possibilities. Our 10GigE service is the first of its kind to be commercially available in both IPv4 and IPv6, and our private peering arrangements on the Tier 1 level are some of the largest such agreements on the planet. NTT Communications' Tier 1 IP backbone is engineered to deliver 10Gig Ethernet on a single ASN, which spans North America, Europe, Australia and Asia. Our 10GigE service gives you the ability to customize your connection based on your current needs, with room to grow. It's flexibility like never before.

From incredibly fast implementation to even faster connectivity, NTT Communications will connect you to the world.

We deliver our 10GigE service off-the-shelf, and ready to quote, with industry leading SLAs and top-notch customer service. And it's available. Now.

HOW FAST CAN YOUR BUSINESS GO?

At NTT Communications, providing you with access is what we do. Just let us know how fast you want to be connected.

Our 10GigE Solution

It's our ultra high bandwidth solution, designed for the largest colocation & hosting firms, large ISPs, DSL providers, and MSOs with the ability to grow to a full 10Gbps. Access speeds up to 10,000Mbps (10Gbps) with our 10GigE solution.

Gigabit Ethernet

It's our very high bandwidth solution, designed for large corporations, universities, colocation & hosting firms, and ISPs with the ability to grow to a full 1Gbps. Access speeds up to 1,000Mbps (1Gbps) with our Gigabit Ethernet solution.

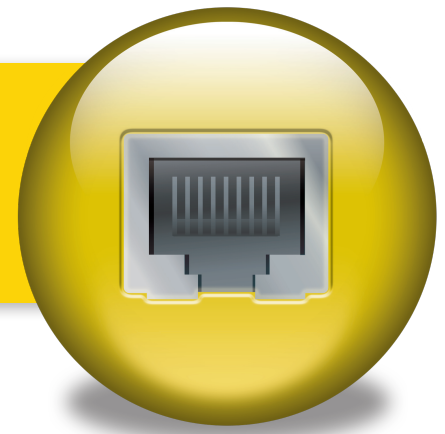

Fast Ethernet

It's our flexible bandwidth solution, designed for growing enterprises, professional firms, and healthcare providers with the ability to grow to a full 100Mbps.

NTT Communications

Ethernet Access

Accelerate your connection to the world with NTT Communications.

MAKE THE SWITCH

Switching over to NTT Communications' Ethernet service, at any speed, will give you:

Choices: You choose your bandwidth and you pick the equipment that's right for your business.

Ease: High-speed access integrates seamlessly with your existing LAN technology, and installation is remarkably fast.

Speed: Our 10GigE service is the fastest access on the planet.

Freedom: Unlimited IP addresses that run IPv4, IPv6, or Dual Stack.

Connectivity: With our 10GigE service, you gain direct access to Asia, the world's largest potential market, and to Europe and the U.S.

Protection: Proactive, 24x7 network monitoring from our Network Operations Centers.

Savings: By eliminating costly legacy circuits and replacing them with simple, highly efficient Ethernet services, you cut costs (monthly costs may be less expensive with Ethernet than with point-to-point connections). Hardware and management costs are decreased as well.

Options: Excellent redundancy is available for customers who require diversity in circuit types. We help you establish a scalable, flexible path for future upgrades.

Immediacy: Access a real-time online control panel utility for viewing and usage of statistics and patterns.

Guarantees: We'll give you our industry leading Dedicated Access Network SLAs.
