

NTT Communications

# Dedicated Internet Access

## The Best Fit

*At NTT Communications, we want you to have options and fast, secure data transport. So we provide you with the possibilities, and you choose the most effective way your site can connect to our network.*

From an NTT Communications' POP to wherever you are, our Dedicated Internet Access provides a direct Internet backbone connection. You don't have to share that connection with any other customer. It's all yours. And with our multiple offerings, you can choose the capacity that will match your needs. We'll even help you procure a last-mile technology from an LEC, if you want it.

At NTT Communications, providing you with truly dedicated access is what we do.

You choose your bandwidth and we'll give it to you, along with our award-winning, 24x7 toll-free technical support. Pick from our selection of routers from Juniper and Cisco, and that's really all it takes. We'll do the rest. And you can upgrade to a higher bandwidth at any time.

Present needs and future requirements, we've got you covered.

### OUR OFFERINGS

With NTT Communications, we provide you with the Internet access that will best suit your business. Offering IP transit speeds from 20Mbps to 10Gbps, we utilize the following bandwidth options to deliver our IP transit (in order):

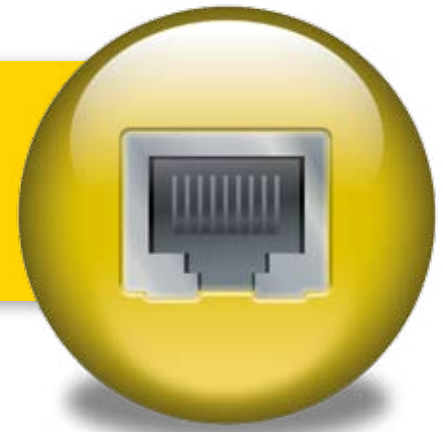

- DS3: Up to 45Mbps
- Fast Ethernet: Up to 100Mbps
- OC3/STM1: Up to 155Mbps
- OC12/STM4: Up to 622Mbps
- Gigabit Ethernet (GigE): Up to 1Gbps
- OC48/STM16: Up to 2.4Gbps
- OC192/STM64: Up to 9.95Gbps
- 10 Gigabit Ethernet (10GigE): Up to 10Gbps

NOTE: Internationally, OC changes to STM

- OC3 = STM1
- OC12 = STM4
- OC48 = STM16
- OC192 = STM64

# Dedicated Internet Access

## PRICING PLANS

Each of our plans is tailored to meet different needs. We'll help you find one that matches your usage patterns, your IP strategy, and that fits in your budget. NTT Communications will give you the most reliable connectivity in the industry, and you pay for it in a way that allows your business to run cost-effectively.

### Fixed Options

Our Fixed Options plan is ideal for companies with stable Internet usage patterns and a fixed budget, though it is available for all connection types. We'll provide a fixed bandwidth level designed to meet your company's current requirements, and you can always upgrade, easily, with your business' growth.

### Burstable Options

Our Burstable Options plan is available for all connection types. We'll set you up with a circuit at a fixed rate, but during peak usage periods this plan allows for bursting to higher levels. Your business will commit to a base level of bandwidth each month. You just pay a surcharge for the excess usage, and you can utilize the additional bandwidth whenever necessary.

## THE BASIC COVERAGE, AND THEN SOME

All of our Dedicated Internet services provide you with:

**Freedom:** Unlimited IP addresses that run IPv4, IPv6 or Dual Stack.

**Protection:** Proactive, 24x7 network monitoring from our Network Operations Centers.

**Immediacy:** Access to a real-time, online control panel utility for viewing statistics and patterns.

**Hardware:** You select CPE products based on your needs.

**Partnership:** Your local loop will be coordinated, ordered and provisioned with one of our many partners across the globe.

**Guarantees:** We'll give you our industry leading Dedicated Internet Access SLAs.

**Simplicity:** Easy-to-read billing statements.

Choose the bandwidth that's right for you, and we'll have the data flowing your way. Fast.
