

NTT Communications

Managed Firewall Services

Be prepared for unforeseen threats with NTT Communications.

Access Denied

Networks are subject to a significant number of unauthorized access attempts. Your network should be protected by Firewalls.

NTT Communications' Managed Firewall solutions effectively select the traffic allowed to access your network. Our Firewalls help block undesirable network traffic so our security personnel can minimize the likelihood of future attacks.

NTT Communications' Firewall solution is flexible so it can adapt to new threats. That's all while giving authorized users freedom, allowing them to take full advantage of the network and the information traveling over it. NTT Communications was the first ISP to offer an IPv6 Managed Firewall solution, so you can upgrade your network and stay protected. Our Managed Firewall solutions help you implement optimal security architecture in a manner that is also cost-effective for your organization. At NTT Communications, our experts will manage your Firewall so your staff won't be burdened.

OUR SERVICES

Our Managed Firewall solutions differ by support level. Choose the one that will ensure your business optimal performance.

All Services

Guarantee unlimited configuration changes/tuning during initial 30 days.

Our Basic Firewall

Gives you 2 configuration change requests per month.*

Our Enhanced Firewall

Gives you 8 configuration change requests per month.*
And 3 emergency change requests.*

*Unused requests do not carry over.

NTT Communications

Managed Firewall Services

Be prepared for unforeseen threats with NTT Communications.

THE COMPONENTS

With NTT Communications' Managed Firewall you get:

The Basics

- Design and implementation of services — standalone or high-availability configuration options
- All hardware and software components included
- Support for both IPv4 and IPv6
- Outstanding Service Level Agreements
 - Availability:
 - 98% for Standard Availability
 - 100% for High Availability
 - Change Management:
 - 4 hours for Emergency
 - 24 hours for Standard
 - Times can be expedited for extreme situations
 - Outage Notification:
 - 15 minutes
- 24x7 Monitoring
 - Our security professionals, who know your specific network, constantly monitor and manage your system
 - You'll receive ongoing, day-to-day monitoring and continual maintenance to keep your Firewall current
 - Every time someone comes into or out of your network (ie. employee surfs the web, someone accesses your Web Server) that information is saved in your Firewall
 - Our security experts analyze the many alerts of the Firewall system in real time — you will know as soon as something bad happens

THE EXTRAS

Management tasks we perform:

- Oversee function of a new device or your existing device
- Make necessary policy changes
- Update all the software and hardware when needed
- Ensure your box is up and running and notify you if it's not

Vulnerability Scans

Done from both inside and outside your network, we'll find the holes and give you a summary (at high to medium level) of your network.

Emergency Response

Security experts will help handle critical situations to make sure the appropriate escalation takes place and all information is captured.
