

NTT Communications

Virtual Private Network

Private security from server to receiver with NTT Communications.

Your Privacy, Protected

As technology evolves, so do your security risks and the time and energy it takes to keep your network protected. Unsecured remote access makes it easier for hackers to get into your organization's LAN, Intranet and other critical systems. Protect your networks with NTT Communications' Unified Threat Management (UTM) VPN solution.

Our UTM VPN service, as a compliment to our Firewall service, gives you the routing, encryption, authentication, and data integrity you need to keep connectivity across managed IP networks and the Internet secure. Plus, our VPN provides you with the powerful security of a private network at a cost comparable to a shared network. That's true savings.

With NTT Communications, your network's privacy is protected, through and through.

YOUR SECURE UTM VPN ACCESS

At NTT Communications, we know how important it is to protect your remote users while they access sensitive information. So we provide secure, encrypted paths over the Internet for employees and business partners to access confidential company resources.

Our UTM VPN service connects remote users, branch offices, suppliers, and customers with the cost and performance advantages of public IP networks and the security and control of private networks.

All of your data is decrypted when it reaches our device. And with additional UTM features or security protections inside your Firewall, no viruses, malware, spyware, or other harmful activity from the source of the VPN tunnel enters your network.

We ensure all traffic coming in through the VPN is secure. And we'll provide you with Traffic Reports to keep you informed.

It's security you can count on, from NTT Communications.

NTT Communications

Virtual Private Network

Private security from server to receiver with NTT Communications.

THE BENEFITS

With NTT Communications' UTM Virtual Private Network solutions, you get:

- A Secure Online Web Portal
 - Get on demand access to targeted reporting of your VPN usage and status.
- 24x7x365 Management & Technical Support
 - Our Security Engineers are available for you day and night, 365 days a year to ensure you receive the support you need, when you need it.
- Integrated Services
 - NTT Communications offers additional security services that can be fully integrated with your existing services.
